# 1 SHOT STEEL STUD ANCHOR

SCAN FOR INSTALLATION VIDEOS

Our new **1Shot Steel Stud Anchor** provides a quick and easy way to hang anything in your **steel stud** home or building

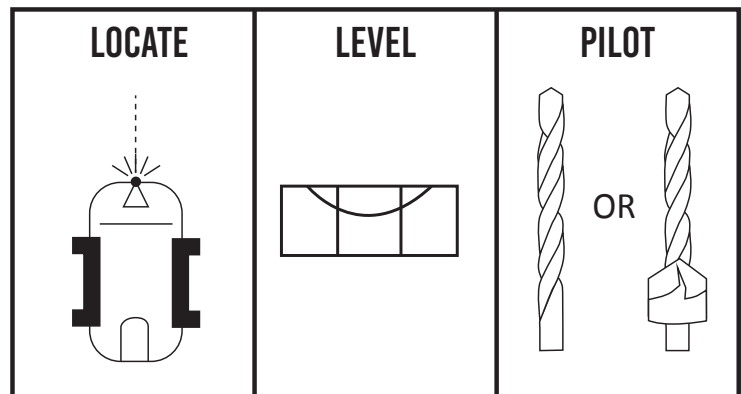

From condominium high-rises, offices, hospitals, schools and prisons, steel stud structures are starting to dominate our skylines and, they are presenting a unique problem. Until now, screwing into 25 gauge steel studs and getting a real grab with serious grip had been nearly impossible, thus creating a labor intensive and costly need to insert solid backing behind drywall to support coming cabinetry, shelving, etc

Our uniquely designed anchor is easily installed into 25 gauge steel studs using these three easy steps: **1)** find the center of the stud, **2)** drill a small pilot, **3)** install the **1Shot Steel Stud Anchor** !

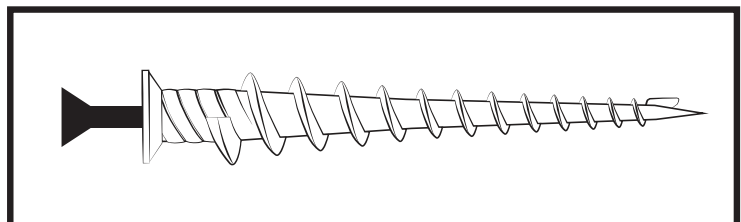

Now you can safely and securely hang cabinetry, shelving, flat screen TV's, grab bars, hand rails and much, much more directly to steel studs, and the **1Shot Steel Stud Anchor** is load rated to **300 pounds**

Check out our installation videos to see the amazing results for yourself: [www.steelstudanchor.com](http://www.steelstudanchor.com)
